1 Visually Identifying Spatial Autocorrelation

- Visit `http://geo-haffner.com`

- Example login:

  - Username:

  - Password: wec-gis

- Open the file "wec-gis/scripts/random-maps.R"

- Use the "Run" button to execute each line individually

- Once you reach the end of the file, maps should generate automatically

- Type "real.data" in the console to see which map holds the actual data

- Put the cursor on line 40 to run the code again

- On line 40, replace "Flood" and "Purples" with other options
